Problem 1: Curriculum Vitae App.   **[50 Points]**

Discuss with your team member and design an attractive android app to show your Curriculum Vitae(CV).

Creativity & Design : 20 points

 Coding: 30 Points

Here one sample idea is provided to you using Fragments. But you can use your creativity to develop this app.

Create a Curriculum Vitae app with four menu items. Home, About me, Work Experience, Contact.

Your name and Qualification is visible and common for all the Fragments.

Create four fragments.

1. The Default fragment page is Home may contains your image, about yourself, achievements, blogs etc.,
2. If the user select the About me, describe about yourself in that Fragment like educational background, personal info, strengths, weakness etc.,
3. If the user selects Work, describe about your working background, experience, project info etc., in that fragment.
4. If the user selects Contact, it shows address, phone, email, face book, twitter etc.

Problem 2: Shared Preferences.   **[10 Points]**

Use the Created Login page for the Walmart store from Lesson - 4. Use the Shared Preferences concept to store the last login credentials.
